Introduction–

The CSIT department hosted an expert session on " **ER Diagram :An Introduction to Data Modelling**".The session aimed to provide students with foundational knowledge of data modeling concepts, specifically focusing on Entity-Relationship (ER) diagrams, which are crucial for effective database design.

Objectives

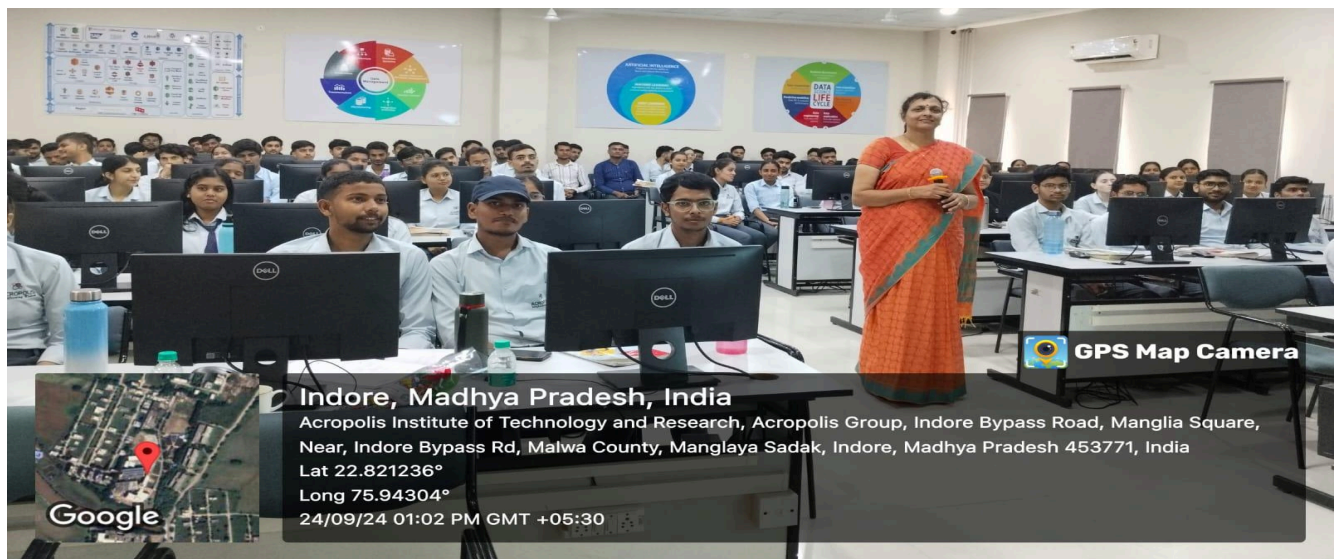

The primary objectives of the workshop were to:

- Introduce students to the basics of data modeling and its significance in database design.
- Explain the components of ER diagrams, including entities, attributes, relationships, and cardinality.
- Provide hands-on experience in creating ER diagrams using real-world examples.

A special thanks to Prof. Geeta Santosh, HOD, FCA, for her invaluable support and expertise in facilitating this session. Her insights and guidance greatly enhanced the quality of the session and inspired participants to explore data modeling further. Also thankful to **Dr. Shilpa Bhalerao, HOD CSIT** for her presence and guidance, as well as to all CSIT faculty members for their cooperation.
